PROFESSIONAL EXPERIENCE

Supper New York, NY
Machine Learning Engineer Aug 2023 - present

Only ML engineer from Aug 2023 – Aug 2024; helped onboard and ramp a second ML engineer.

- Built natural language → SQL/Python/D3 generation for analytics workflows, with validation and error recovery.
- Implemented multi-output generation with validation, scoring-based selection, and retry/fallback logic; built batch eval tooling to surface and reduce recurring failure modes.
- Tracked new model releases and tested upgrades across pipeline stages, weighing quality, cost, latency, and failure rates before switching.
- Fine-tuned models for intermediate pipeline tasks early on, then migrated to general-purpose models once they met quality needs and reduced maintenance overhead.
- Led development of evaluation and error-analysis datasets, including ongoing refresh, failure-mode categorization, and driving fixes based on findings.
- Helped lead the migration from a fixed multi-step pipeline to a tool-driven workflow with dynamic routing and execution.

Columbia University New York, NY
Research Assistant, Zhou Yu NLP Group Apr 2023 - Aug 2023

- Leading data collection for fine-tuning of LLMs (FLAN-TS, Alpaca) on news articles containing embedded tweets.
- Designing and implementing the pipeline for data augmentation using ChatGPT.

The Depository Trust and Clearing Corporation (DTCC) Boston, MA
Senior Software Analyst, Internal Trade Processing Jul 2020 - Aug 2022

- Worked as full-stack developer on a team that maintains the industry's largest online database for the maintenance and communication of account and standing settlement instructions used by investment managers, broker dealers, and custodian banks.
- Acted as lead UI resource to implement changes and improvements for the web application (HTML/CSS/TypeScript/Backbone.js).
- Remediated vulnerabilities identified by annual penetration testing to reduce risk to the application and organization (Java/SQL).
- Executed company-wide initiative to improve code coverage of legacy and novel Java code over the course of 2021.

Cornell University Ithaca, NY
Python Tutor, Computer Science Department Jan 2019 - May 2020

EDUCATION

Columbia University New York, NY
Master of Science, Computer Science Dec 2023

- Relevant Coursework: Neural Networks & Deep Learning, Natural Language Processing, Artificial Intelligence, Databases, Applied Machine Learning, Advanced Spoken Language Processing, Advanced Database Systems

Cornell University Ithaca, NY
Bachelor of Science, Information Science, Minor in English May 2020

- Relevant Coursework: Statistics, Python, Data Science, Information Ethics, Internet Law, Networks, Networks II: Market Design, Human-Computer Interaction Design

SKILLS

- **Technical:** Python, SQL, TensorFlow/Keras, Pandas, NumPy
- **Machine Learning:** LLM pipelines, prompt engineering, model evaluation/benchmarking, fine-tuning, embeddings/semantic search, entity resolution
- **Web:** HTML, CSS, JavaScript, PHP
- **Languages:** Spanish (proficient), French & Hebrew (basic)
